(54) Title: **FURNITURE SUPPORT SYSTEM**

(57) Abstract: A furniture support system for workstation work tops including a support post (19) having a first locating formation (3) that extends longitudinally along at least a part of the length of the support post (1), and a support element (9, 23) having a second locating formation (15) that is complementary to the first locating formation (3) and engageable therewith, the first and second locating formations (3, 15) being constructed and arranged for sliding movement in the longitudinal direction, such that the position of the support element (9, 23) relative to the support post (1) is adjustable.
